Status(Rural/Urban) : Urban	Education Status : Graduate
Is Requester Below Poverty Line ? : No	Citizenship Status : Indian
Amount Paid : 10)	Mode of Payment : Payment Gateway
Does it concern the life or Liberty of a Person ? : No(Normal)	Request Pertains to :
Information Sought : for all Powergrid substation tenders PGCIL requires thermovision camera. The specifications of termo vision cameras only favours to one party i.e. FLIR. Wherever in technical specifications of tenders PGCIL have requirement of hot spot temperature measurement of 0 to 2000 deg C this application is normally not used in substation equipments. if yes then PGCIL is requested to inform in substation equipment how many times they have actually used temperature measurement range above 1200 deg C with name of substations which are in operation. These cameras are very high ended and only one player can offer this camera which leads more money of Indians going out to US company. PGCIL is requested to encourage local manufacturer and revise the specifications in order to optimise costs.
