Annexure-I

Information Sought (1): What is the responsibility or work allocated to electronics and communication engineer in electrical substations in POWERGRID.

Reply: For smooth functioning of a sub-station various types of activities are required that need employees with expertise in electrical, electronics, communication, civil works, etc. Accordingly employees are posted as per the requirement.

Information Sought (2): If electronics and communication engineer were to be given same work responsibility as electrical engineer at substation why is POWERGRID recruiting them through separate written test or interview both of which test knowledge in their respective branch of studies and also give class room training in separate subjects i.e. electrical systems and telecom.

Reply: Vide above question, requester seems to be seeking reason rather than information and it does not come under the definition of information under the RTI Act.
