Thanking you,

भवदीय,

(अजय होलानी) 5/3

अपर महाप्रबंधक (के.आ.) एवं के.लो.सू.अधिकारी

Email ID: cpio.cc@powergrid.co.in

Information sought by Sh. Sheshadri N of Kadir, Andhra Pradesh
under the RTI Act, 2005.

The information sought by the requester is general in nature and do not pertain specifically to any transmission line of POWERGRID. However, following may be noted:

There is no restriction of 400kV line coming into town which is already established or under development provided adequate electrical clearances are maintained and other safety regulations are followed.

It may be informed that the transmission lines in the country are constructed as per the Central Electricity Authority's Regulations 2010/2011 viz. "Technical Standards for Construction of Electrical Plants and Electric Lines", "Measures relating to Safety and Electric Supply" & "Safety requirements for Construction, Operation and Maintenance of Electrical Plants and Electric Lines" as well as Bureau of Indian Standard IS: 5613. These documents are available in public domain and can be accessed from the web sites/ offices of CEA & BIS. These regulations provide the parameters for various voltage levels of the transmission lines.

CEA's Regulations for "Measures relating to Safety and Electric Supply, 2010" inter-alia stipulate under clause no. 61, the required minimum electrical clearances in case of an overhead line conductor passing above or adjacent to any building or part of a building.
