Status :	Rural	Educational Status :	
Citizenship :	Indian	Is Appellant below poverty line ? :	No
CPIO of Public Authority Approached :	Details not provided	CPIO's Order/Decision Date :	Details not provided
CPIO's Order/Decision No. :	Details not provided		
Ground For Appeal :	Provided Incomplete,Misleading or False Information		
Text of RTI First Appeal :	<p>Respected Power Grid Team, Thank you for your response for my RTI application but i need clear information on below given points. Kindly support. I am a farmer son from Kandikkattuvalau(Village), Erode (district), Tamilnadu (Pin 638115). As per my understanding two 400kV power grid line from Salem substation to Udumalpet substation is passing through our village (Kindly refer the attached location map). 2acre of our agriculture land is falling under this power line ROW (Right-Of-Way). We are interested to plant orchid from some of grafted fruit trees such as Mango, Cashew, Guava, Lemon, Orange, Tamarind, black plum or jamun under the area of 400kV line ROW (Right-Of-Way) which will not grow beyond a height of 5 meters (15 feet) in its life time from ground level. regarding this i need following information for understanding and act accordingly. 1. What is the maximum allowable height for trees / plants to grow under 400kV Power grid Line ROW (Right-Of-Way) from ground surface level (requesting to provide the allowable height from ground surface and not from conductor as i cant measure the conductor height). 2.Based on the allowable height limit if i maintain (by trimming & pruning) my fruit tree height then the tree need not to be removed (cutting down from root) for Power Grid line. Requesting your valuable positive reply. so that i can convert my agri land into fruit orchid. Thanks in advance. J.Senthil Kumar 122,Kandikkattuvalasu (po) Avalpoondurai (via) Erode - 638115 Mobile: 9994142991 Mail : thilsen.j@gmail.com</p>
