Sub: Status of complaints
Ref: CVC Complaint Management System Complaint No: 156865/2020/Vigilance-6
Sir,

With reference to the above and your related other complaints, the status is as follows:-

No.	Reference	Remarks
1.1	Complaint dated 27.07.2020 to CVC against former Dy.CVO (enclosing earlier complaints/protective disclosure dated 29.07.2019 & 13.08.2019), forwarded by the Commission thru' their Complaint Management System portal with above cited reference on 17.08.2020	Allegations seen to be vague & factually incorrect. Accordingly, complaint "Filed" on 21.08.2020 and status updated on CVC portal.
1.2	Protective Disclosure dated 29.07.2019 addressed to CMD (with copy to CVO) regarding allegations against then ED ER-1	Since complainant's letters were not addressed to CVO, letter dated 30.08.2019 was sent to him by POWERGRID Vigilance to confirm through a letter with identity proof whether complainant wanted action on his complaint by Vigilance Department of POWERGRID treating it as a complaint under CVC procedure. Complainant responded in the affirmative vide his letter dated 12.09.2019.
1.3	Protective Disclosure dated 13.08.2019 addressed to CMD (with copy to CVO) giving additional information in continuation to earlier disclosure dated 29.07.2019	
1.4	Complaint dated 12-09-2019 to POWERGRID Vigilance requesting action on Protective Disclosures dated 29.07.2019 & 13.08.2019 as vigilance complaints under CVC procedure	Allegations made against the then ED ER-1 & officials of ER-1 scrutinized and found to be administrative in nature without having any vigilance angle in the matter. Accordingly, complaint "Closed" on 27.12.2019.

- 2.0 As regards peripheral reference of collapse of towers/pile foundations of the 400kV D/C Kishanganj-Patna transmission line as made in your complaints dated 13.08.2019 & 29.07.2019, investigation is on with technical examination underway amid Covid19 constraints. Necessary steps for physical testing have been taken by departments concerned in co-ordination with this office and early testing is planned after receding of river water level post monsoon.
- 3.0 This is also to inform you that no further correspondence on status of the above complaints shall be made with you during investigation.

This issues with the approval of CVO, POWERGRID.

Yours faithfully,

(Rajendra Gujer)
DGM(Vig-IW)
