<b>Information Sought :</b>	<p>1. How many first time charging permissions are pending with WRLDC from the date 1st October 2022. What are the reasons and to be mentioned against each project seperately.</p> <p>2. What is the advantage which WRLDC achieves by not giving FTCs without capacitor bank for reactive power consumption.</p> <p>3. Why has been there sudden mandatory requirement of Capacitor bank for reactive power consumption which was not there till Sep/Oct 2022.</p> <p>4. Why cant be the FTC be given with some sort of undertaking with commitment to install within the set time frame.</p> <p>5. Why has been so much of power is wasted by not giving FTC for PV projects which are ready for charging. Given the exact details of project which are ready but FTC has not been given. Also mention the exact capacity.</p> <p>6. Is there any project where half of the capacity has been given FTC and for pending Capacitor bank installation is demanded,</p>
