Dear Sir,

The undersigned applicant most respectfully submits herewith to seek following information under RTI

1. Do the Grid Corporation of India provide power transmission services from power producer to DISCOMS throughout INDIA?
2. Is there any separate arrangement for wheeling the renewable energy as produced by Solar/Wind Projects, to fetch it from production to consumption point, or it is just fed to the common grid system where already power from various coal fired thermal power plants is running?
3. Is there any Method/ Technology to identify the electricity produced from renewable resources (Solar Power Projects / Wind Power Projects) from that of what is produced by a Coal Fired Thermal Power Plant?
4. Do the Grid Corporation has any Power Bank/ Power Storage system so as to store and supply renewable energy during time of intermittency for the sake of power banking?
5. What is the Contribution of Coal Fired Thermal Power Plants in total Energy Consumed in INDIA?

Best Wishes & Regards
