

**Reply of Information sought vide RTI Appeal registration no.
PGCIL/A/E/24/00022 dt 14.05.2024**

The reply for the information sought vide RTI registration no. PGCIL/A/E/24/00022 dt 14.05.2024 is as below, for the approval of the competent authority and further submission to CPIO, POWERGRID.

Information sought:

Sr	Appeal Query	Reply
	<p>Sir, With respect to my RTI no PGCIL/R/E/24/00199, I have requested that please provide me information of 84 no of lines (with ckm of each line), for which LILO of POWERGRID transmission lines was done by other utility like state transmission utilities or other private utilities and terminated at their substations during Q3 FY 2022-23. I have also mentioned that i have tried this data on CEA website as directed earlier RTI no PGCIL/R/E/24/00081. But again, in reply of my RTI questions, CPIO Mr. A Jagannath Rao has provide the same link. I have tried again in CEA and POWERGRID link as provided in RTI reply. but unable to find this numbers. This is very disappointing that after asking again and again, the CEA link is being provided. Sir, if this 84 number is clearly understandable from CEA report, please share that particular page with me or i will again request you to kindly provide me details from your end as it will be readily available with company. In first appeal, I request to provide me details as asked in my RTI from your end. Sorry for any inconvenience. I have attached CEA report also</p>	<p>In respect to your RTI No. i) PGCIL/R/E/24/00199 dt 09.04.2024 ii) PGCIL/R/E/24/00081 dt 21.02.2024 As already communicated in reply to your RTI mentioned above (PGCIL/R/E/24/00081 dt 21.02.2024), the total number of lines and ckm as detailed during Investor meet held in February 2023 was done after reconciliation of all POWERGRID's transmission assets. After reconciliation total 84 numbers of lines and 808 Ckm were added to the figures presented in the previous Investors' meet held in November'22. During the referred period, number of lines increased by 17 with 808 CKM (copy at Annexure- 1). However, total increase of 84 in number of lines as displayed during Inventor's meet in Feb'23, was based on reconciliation done in Q3 of FY 2022-23 for the total number of transmission lines along with CKM, which also included all such LILOs which were done earlier by other Utilities. The List of all POWERGRID's transmission line is attached at Annexure- 2 Regarding website link provided earlier, it is stated that the number of lines and CKM is available there, however the total number of TLs and CKM is to be calculated based on data available on website.</p>
