Sub: Your RTI application dated 05.11.14

Sir,

This has reference to your RTI application received in this office on 12.11.14 through our Kalivanthapattu Substation. The reply against your query is furnished below.

**Query:** The documents pertaining to the purpose for which the land as per schedule mentioned in the application has been acquired by POWERGRID, the extent of land in usage and the impact value arrived on the date of acquiring the property in connection with establishing and aligning 230 kV double circuit transmission line from Kalpakkam to Siruseri shall be furnished. Also documents pertaining to the extent of acquired property classified as Patta land may be furnished.

**Reply:** It may be noted that during construction of any transmission line including installation of towers, no land is needed to be acquired. Power Grid Corporation of India Ltd also has not acquired any land for construction of Kalpakkam to Siruseri 230 kV transmission line and is only having user rights for construction and maintenance of the transmission line/tower along the line route. Compensation is paid only for the damages of tree/crop etc during construction and no land compensation is paid whatsoever. Accordingly, no documents are available on land acquisition pertaining to construction of Kalpakkam-Siruseri 230 kV transmission line.

Thanking you,

Yours faithfully,
