4. The farmers if plant the saple of teak tree, palm tree, coconut tree, neem tree (Hill neem tree) மலைவேம்பு மரம், good graze tree (கல்தூறிஞ்சி மரம்) for the cattle feeding grazing purpose, because the said trees leaves are highly rich nutrition to the cattle and increase the milk secretion level as per the animal husbandry experts.

Further now the cattle culturing horticulture like the supputa fruit trees, mango trees very lengthy level if banana trees more than 20 feets also are providing the sufficient level of income to the farmers, so can plant culture and grow the said type of plantation or not under the high power electricity transmission cable line, please send the information for the common welfare of people who were affected by your said cable line of high power electricity transmission, because thousands together of small farmers basic livelihood an daily survival also affecting.

Whereas please send the information as early as possible to me to the public welfare and my authorized clients purpose, I have enclosed the demand draft a sum of rupees 50 for the sufficient fees for the purpose of providing the information.

Thanking you sir

Yours faithfully
